La potenza esplosiva del vulcano imprigionata in questa collezione unica, che trova la sua forza espressiva nel valore della materia e nell'essenzialità dei tratti grafici.

The explosive power of a volcano imprisoned in this unique collection that finds its expressive force in its valuable materials and streamlined graphics.

La puissance explosive du volcan prisonnier dans cette collection unique qui puise sa force d'expression dans la valeur de la matière et dans l'essentiel des signes graphiques.

Die explosive Kraft eines Vulkans - in dieser einzigartigen Kollektion eingefangen, deren Ausdruck im Wert der Materie und in der Wesentlichkeit der graphischen Linien liegt.

Взрывная мощь вулкана заточена в этой уникальной коллекции, черпающей силу своей выразительности в исходном материале и строгости графического рисунка.

the **one** interiors

Esaltare il valore della materia ceramica in un legame perfetto fra tecnologia ed estetica ispirandosi alla pietra lavica. Raccontare di quanto la potenza esplosiva del vulcano abbia lasciato le sue tracce, tracce di una grafica minimalista e in movimento.

THE ONE INTERIORS è il risultato di una progettazione ceramica che ha perseguito obiettivi di eccellenza, eleganza, ricercatezza, rigore formale ed espressiva essenzialità.

La ricerca tecnologica di THE ONE INTERIORS

I granuli d'acciaio e di vetro, applicati a secco direttamente in linea e cotti a 1200°, sono il frutto dell'accurata ricerca ed analisi sulla compatibilità ceramica dei due elementi. Il particolare tipo di granulo metallizzato in massa utilizzato da CEDiR non è soggetto ad ossidazione e rimane inalterato nel tempo. Un'energica azione meccanica di lappatura, che asporta le parti superficiali del pezzo ceramico, dona a THE ONE INTERIORS il fascino dei giochi di luce e la luminosità tipici del metallo e del vetro.

To exalt the value of the ceramic matter in a perfect bond between technology and aesthetics taking inspiration from the volcanic rocks. To tell about the explosive power of the volcanoes that left their traces, signs of minimalist graphics in motion.

THE ONE INTERIORS is a result of a ceramic design that pursued objects of excellence, elegance, refinement, formal rigour and expressive essentiality.

The technological research of THE ONE INTERIORS

The steel and glass grains, dry applied directly on line and fired at 1200° C., are the fruit of the accurate research and analysis of the ceramic compatibility of the two elements. The peculiar kind of mass metallized grain used by CEDIR is inoxidizable and unalterable. A mechanical process of strong polishing gives THE ONE INTERIORS the charm of the plays of light and the brightness that are typical of metal and glass.

Exalter la valeur de la matière céramique dans un lien parfait entre technologie et esthétique en s'inspirant de la pierre lavique. Parler de la puissance explosive du volcan et des traces laissées, traces d'un graphisme minimaliste et animé.

THE ONE INTERIORS est le résultat d'un projet céramique qui a poursuivi les objectifs d'excellence, d'élégance, de rigueur formelle et de caractère essentiel.

La recherche technologique de THE ONE INTERIORS

Les granules d'acier et de verre, appliqués à sec directement en phase de fabrication et cuits à 1200°, sont le résultat d'une recherche soignée et d'une analyse sur la compatibilité céramique de ces deux éléments. Le type particulier de granule métallisé dans la masse utilisé par CEDIR ne subit pas d'oxydation et ne se modifie pas dans le temps. Un procès énergétique de polissage, qui élimine les parties superficielles du matériel céramique, donne à THE ONE INTERIORS le charme des jeux de lumière et la brillance typique du métal et du verre.

Den Wert der keramischen Materie preisen, durch eine vollkommene Bindung von Technologie und Aesthetik, inspiriert von Eruptivgestein. Die Sprengkraft des Vulkans erzählen, die ihre Spuren hinterlassen hat, Spuren einer minimalistischen Graphik in Bewegung. THE ONE INTERIORS ist das Ergebnis einer keramischen Planung, die sich eine hervorragende Qualität, Eleganz, Gewähltheit, Formstrenge und ausdrucksvolle Wesentlichkeit als Ziele gesetzt hat.

Die technologische Forschung von THE ONE INTERIORS

Die Stahl - und Glaskörnchen, die direkt auf der Schiene trocken aufgelegt und bei 1200° gebrannt werden, sind die Früchte der sorgfältigen Forschung und Untersuchung der keramischen Vereinbarkeit der zwei Elemente. Die besonderen von CEDIR in der Masse benutzten Metallkörnchen sind oxydationsbeständig und bleiben mit der Zeit unverändert. Ein durchgreifendes mechanisches Schlißverfahren, die die obere Schicht des keramischen Stückes entfernt, verleiht THE ONE INTERIORS den Reiz der Lichtspiele und die Leuchtkraft, die dem Metall und dem Glas gehören.
